5) Services Offered:

- (i) The portfolio Manager may provide Discretionary, Non-Discretionary and Advisory Portfolio Management services.

Discretionary Portfolio Management indicate that, the portfolio manager has full discretion to manage the clients portfolio, however investment will be made taking in consideration the risk profile of the client. In case of non-discretionary portfolio, the client directs the portfolio manager to the avenues of investments while the portfolio manager passively manages and executes transaction based on the client's decision.

Under a non-discretionary portfolio, the portfolio manager executes the investment instructions and follows up with the payments, settlements, custody and other back office function.

Under the Advisory option the portfolio manager, based on the risk profile of the client, offers his advice from time to time, however the final decision and execution of the transaction rests with the client.

Our investment management team follows a much disciplined process of fundamental and technical analysis of equity instruments to create a comprehensive range of disciplined strategies. Each open position is closely monitored on daily basis. The investments are made using a sophisticated stock selection methodology.

- (ii) The Portfolio funds will not be invested in any of the Wellworth Share & Stock Broking Ltd. group companies or its associates so as to avoid any conflict of interest.

WW Voyage Fund:

Investment Objective:

- The portfolio management product proposes to offer portfolio management services to high networth individuals (HNI's)/ corporate who are resident Indians and NRI/PIO's from investment into the listed equity market as per the rules and regulations laid down by SEBI and RBI.
- The primary investment objective of the proposed portfolio management product would be to generate capital appreciation over the medium term to long term by investing in equity/ equity related instruments of companies listed in the Indian equity market. This will ensure stability of the funds for investing into the markets and also give the portfolio manager the

ability to stay invested over the medium to long term to ensure adequate generation of returns to investors.

- The WW Voyage Fund will follow a bottom up approach for picking stocks and construct a portfolio representing the highest conviction ideas of the organization.
- The portfolio will essentially invest in high quality companies with good corporate governance track record.
- The endeavor of the portfolio manager will be to identify and pick stocks in companies which have return ratios higher than the market and at valuations lower than market valuations.
- The portfolio's will invest in high quality small-cap, mid-cap and large-cap stocks and will consider all appropriate risks while constructing the portfolio.
- The portfolios are expected to be fairly concentrated upto 25 stocks which will provide adequate diversification and at the same time ensure meaningful holdings to maximize returns from individual holdings.

6) RISK FACTORS:

The investments made in securities are subject to market risk and there is no assurance or guarantee that the objectives of investments will be achieved. Following are the risk factors as perceived by management:

- Investment in equities, derivatives and mutual funds and Exchange Traded Index Funds are subject to market risks and there is no assurance or guarantee that the objective of investments will be achieved.
- As with any investment in securities, the Net Asset Value of the portfolio can go up or down depending upon the factors and forces affecting the capital markets.
- The performance of the portfolio may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems in equity and debt markets.
- The past performance of the Portfolio Manager does not indicate its future performance. Investors are not being offered any guarantee returns.
- The performance of the Assets of the Client may be adversely affected by the performance of individual securities, changes in the market place and industry specific and macro economic factors. The investment strategies are given different names for convenience purpose and the names of the Strategies do not in any manner indicate their prospects or returns.
- Investments in debt instruments and other fixed income securities are subject to default risk, liquidity risk and interest rate risk. Interest rate risk results from changes in demand and supply for money and other macroeconomic factors and creates price changes in the value of the debt instruments. Consequently, the Net Asset Value of the portfolio may be subject to fluctuation.
- Investments in debt instruments are subject to reinvestment risks as interest rates prevailing on interest amount or maturity due dates may differ from the original coupon of the bond, which might result in the proceeds being invested at a lower rate.
- The Portfolio Manager may invest in non-publicly offered debt securities and unlisted equities. This may expose the Client's portfolio to liquidity risks.
- Engaging in securities lending is subject to risks related to fluctuations in collateral value/settlement/liquidity/ counter party.
- The Portfolio Manager may use derivatives instruments like index futures, stock futures and options contracts, warrants, convertible securities, swap agreements or any other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the Regulations and guidelines. Usage of derivatives will expose the Portfolio to certain risks inherent to such derivatives. As and when the Portfolio Manager deals in the derivatives market on behalf of the Client, there are risk factors and issues concerning the use of derivatives that investors should understand.

- Derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counter party”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value.
- The Net Asset Value may be affected by changes in settlement periods and transfer procedures.
- Decisions regarding investments in the scheme are made only after careful analysis and research by the WSSBL research team. Such investment decisions are taken keeping the SEBI Rules and Regulations in mind. Investment in the equity markets are subject to market risks. WSSBL gives no assurance or guarantee that the objectives of the scheme will be achieved.
- Performance of the equity portion of the scheme may be adversely affected by price fluctuation risks, company or sectoral risks or other macro-economic factors. The debt instrument and fixed income securities portion may be affected by interest rate risk, liquidity risk, credit risk and reinvestment risk.
